

## Hedgehog Leaf Separator

For all kinds of root and tuber vegetables

Leaf separator with frame  
as special version

- Effective leaf separation
- All metal parts in contact with product are made of stainless steel
- Low maintenance and wear resistant

## Hedgehog Leaf Separator

The product to be deleafed is placed on the ascending nap belt. The produce slides downwards against the running direction of the belt. Loose leaves and non-sliding constituents are arrested by the naps and carried upwards. A rotating brush at the end of the belt cleans the belt regularly.

The hedgehog leaf separator is equipped with a height and inclination-adjustable frame made of painted steel. All metal parts in contact with product are made of stainless steel.

### Technical data

Working Width	800; 1,200 mm
Distance between axes	1,600 mm
Power input, belt	1.1 kW
Power input, cleaning brush	0.75 kW
